Company Instruction

Springer Nature advances discovery by publishing robust and insightful research, supporting the development of new areas of knowledge and making ideas and information accessible around the world.

Key to this is our ability to provide the best possible service to the whole research community: helping authors to share their discoveries; enabling researchers to find, access and understand the work of others; supporting librarians and institutions with innovations in technology and data; providing quality publishing support to societies; and championing the issues that matter – standing up for science, leading the way on open access and being powerful advocates for the highest quality and ethical standards in research.

As a research publisher, Springer Nature is home to trusted brands including Springer, Nature Research, BMC, Palgrave Macmillan and Scientific American.
