Company Instruction

LG Display Co., Ltd., the world's leading and most innovative display company, began developing TFT-LCDs in 1987 and started mass production at P1 in 1995.

LG Display produces displays for diverse applications such as TV, IT, Mobile, Commercial, Automotive, and OLED Light. The company executes continuous R&D and investment in next-generation displays such as Flexible and Transparent displays.

Headquartered in Seoul, Korea, LG Display operates production plants and sales/marketing offices worldwide. The company aims to achieve customer satisfaction based on innovative technology and marketing capability.

LG Display is the world's leader in the development and production of OLED panels and has the largest global market share for large-size TFT-LCD panels.
